

AMCAN INDUSTRIAL BUILDING SYSTEM (IBS)

With the combination of our Light Gauge Steel (LGS) Framing and our Patented Concrete Panel System, **AMCAN** is the first company in Sarawak to offer the Industrial Building System (IBS) for a total building construction solution.

AMCAN LGS Framing System provides custom designed and fabricated framing structures using smart complex software operating system that designs, models and offers viewing in 3D format, thus increasing the efficiency during construction of the frame structure, in turn reducing time and

labor costs, as well as rectification works on site which ultimately translates into cost saving for contractor and clients.

AMCAN Concrete Panel System is our latest patented tongue and groove locking designed concrete panel. The concrete panel is prepared using computerized mixer to ensure the consistency of the mixing grade, weight and durability of the product. It is designed to achieve comprehensive strength of 22MPa to 25MPa in seven days. This reduces production time and labor cost, making handling of the panel a breeze.
